Becoming a **PI PRACTITIONER™**

Maximizing Business Performance with Pl

People are behind the success or failure of all business objectives.

Our two-day *Becoming a PI Practitioner* workshop gives you the hands-on training needed to realize the people problems standing between you and your business objectives. Poor performance, mismanagement, low productivity, high turnover, low engagement - all of these issues can be addressed through the effective application of PI's human capital management methodology in your business.

Learn a simple methodology that helps you understand your people so they can take you where you want to go. In this workshop, you will:

- Identify a set of business challenges, uncover associated people issues, and create goals to fix them
- Learn strategies that directly impact your challenges through the use of PI tools and workforce assessment software
- Leave with an action plan to overcome your challenges and achieve your goals

HIRE

This workshop will teach you how to leverage our Require, Hire, Inspire™ framework so you can accurately define the true requirements of specific roles, hire top performers who naturally have what it takes to deliver on your business plan, and keep them engaged and inspired through the use of PI across the entire employee life cycle.

Becoming a PI PRACTITIONER

Leave this workshop feeling prepared to create a stronger, more cohesive and efficient workforce, tackle the most complex business challenges, and accomplish your objectives faster than you ever thought possible.

WHO SHOULD ATTEND?

- · Executives or managers responsible for business strategy, planning, and success
- · HR professionals who will serve as the PI expert and advisor in their organization
- · Any employee continuing their PI learning journey after attending another PI workshop
- · Anyone looking to use PI to address their day-to-day business challenges

The Becoming a PI Practitioner workshop includes materials from PI's What Drives People? TM and Managing People to Perform TM workshops as an introduction to The Predictive Index system, leaving attendees with a broad knowledge of the methodology and practical applications.
